PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive, component-based web applications using React.js and modern JavaScript (ES6+). Proven ability to deliver clean, maintainable code across personal and production-grade projects, with exposure to Git-based version control, and cloud deployment via Vercel. Holds a B.Sc. in Computer Science and certifications in JavaScript/React from Cisco Academy. Seeking frontend developer roles where strong fundamentals, fast learning, and attention to UI quality drive impact.

SKILLS

Languages : JavaScript (ES6+), React.js, HTML5, CSS3, PHP
APIs and Data : REST API, JSON, Fetch API, MySQL
Styling and UI : Responsive Design, CSS Flexbox/Grid, Cross-browser Compatibility
Tools : Git, GitHub, VSCode, Vercel, Netlify
Soft/Methodologies : UI/UX Principles, Accessibility

EXPERIENCE

Federal Polytechnic Bauchi Dec. 2025 – Present
ICT Support Officer NYSC Bauchi, State

- Resolved hardware, software, and connectivity issues across 100+ campus devices, maintaining stable ICT operations for a polytechnic community of 50+ staff and students
- Reduced recurring technical issues by identifying and documenting repeat fault patterns, improving response workflows and cutting average resolution time.
- Ensured continuous uptime of campus systems and network services through proactive maintenance and systematic fault diagnosis.

IHS Towers Feb. 2024 – April. 2024
Network Surveillance Intern Lagos, Nigeria

- Monitored 100+ communication tower networks in real time, maintaining system availability and flagging performance anomalies before they escalated to outages.
- Logged and reported 20+ incidents per week, contributing to consistent service quality standards across the network infrastructure.
- Collaborated with cross-functional technical teams to investigate and resolve network faults, supporting overall infrastructure reliability.

PROJECTS

Christian Corps Fellowship Platform

Stack : HTML, CSS, Javascript

- Built and deployed a responsive web platform using HTML, CSS, and JavaScript, connecting Christian corps members across Nigeria through event listings, community joining flows, and resource sharing features.
- Designed a mobile-friendly UI with CSS Flexbox/Grid, ensuring cross-device accessibility for users across multiple states during their service year.
- Delivered a fully functional community platform as a solo project, from initial design through deployment as a live web application.

Ticket Management Web App

Stack : React

- Developed a single-page ticket management application in React, implementing reusable components and structured state management to simulate a real-world issue-tracking workflow.
- Architected the frontend using a component-based structure with clear separation of concerns, improving code maintainability and scalability.
- Deployed on Vercel with source code published on GitHub, demonstrating end-to-end ownership from development to production.

EDUCATION

University of Nigeria, Nsukka

Bachelor of Science in Computer Science

Aug. 2020 – Dec. 2024

Enugu, Nigeria

- **Coursework:** Data Structures, Algorithms, Databases, Computer Systems, Machine Learning

CERTIFICATION

- Web Development Certification – Udemy, 2024
- Git and GitHub Version Control – Udemy, 2024
- JavaScript / React Certification - Cisco Academy, 2025
